**Efficiency, Equality and the Ownership of Property (Routledge Revivals)** Oct 26 2019 First published in 1964, this is a study of the extreme inequalities in the ownership of property, in economies across the globe. Professor Meade examines in depth the economic, demographic and social factors which lead to such inequalities. He considers a wide range of remedial policies – educational development, reformed death duties and capital taxes, demographic policies, trade union action, the socialization of property, the development of a property-owning democracy, the expansion of the welfare state. The argument is expressed in precise analytical terms, but the main exposition is free of mathematics and technical jargon and is designed for the interested layman as well as the economist.

*Evaluation for an Equitable Society* May 14 2021 Governments and organizations of all shapes and sizes espouse values of equity and social justice. Yet, there are many examples of unfair social arrangements and employment conditions, dysfunctional government practices, and growing income inequality in both developed and developing countries worldwide. The profession and transdiscipline of evaluation is well equipped to address issues of inequality and social injustice, but until recently has been much more focused on primary stakeholder and donor satisfaction (being as useful as possible to funders of interventions and evaluations) and accountability concerns. The authors in this volume challenge the field of evaluation to become more concerned about using evaluation to develop more equitable organizations, governments, and societies. Leading evaluation theorists and practitioners including Michael Scriven, Jennifer Greene, Thomas Schwandt, Emily Gates, Sandra Mathison, Karen Kirkhart, Saville Kushner, Lois-Ellin Datta, Ernest House, Robert Stake, Patricia Rogers, Robert Picciotto and Stewart Donaldson, provide a range of visions for how evaluation can play a much larger role in facilitating social justice across the globe. Evaluation for an Equitable Society will be of great interest to evaluation practitioners, students and scholars. It will be of interest to those teaching and taking introductory evaluation courses, as well as advanced courses focused on improving evaluation theory and practice.

*Social Solutions to Poverty* Dec 21 2021 The voices of famous and lesser known figures in America's quest to reduce poverty are collected for the first time in this comprehensive historical anthology. The book traces the most important ideas and contributions of citizens, activists, labour leaders, scholars, politicians, and governmental agencies to ensure American citizens the basics of food, housing, employment, education, and health care. The book follows the idea of poverty reduction from Thomas Paine's agrarian justice to Josiah Quincy's proposal for the construction of poorhouses; from the Freedmen's Bureau to Sitting Bull's demand for money and supplies; from Coxey's army of the unemployed to Jane Addams's Hull House; from the Civil Works Administration to Dr. Martin Luther King, Jr.'s call for an Economic Bill of Rights; and from William Julius Wilson's universal programme of reform to George W. Bush's armies of compassion.

**Personalized Law** Oct 07 2020 We live in a world of one-size-fits-all law. People are different, but the laws that govern them are uniform. "Personalized Law"---rules that vary person by person---will change that. Here is a vision of a brave new world, where each person is bound by their own personally-tailored law. "Reasonable person" standards would be replaced by a multitude of personalized commands, each individual with their own "reasonable you" rule. Skilled doctors would be held to higher standards of care, the most vulnerable consumers and employees would receive stronger protections, age restrictions for driving or for the consumption of alcohol would vary according to the recklessness risk that each person poses, and borrowers would be entitled to personalized loan disclosures tailored to their unique needs and delivered in a format fitting their mental capacity. The data and algorithms to administer personalize law are at our doorstep, and embryos of this regime are sprouting. Should we welcome this transformation of the law? Does personalized law harbor a utopic promise, or would it produce alienation, demoralization, and discrimination? This book is the first to explore personalized law, offering a vision of law and robotics that delegates to machines those tasks humans are least able to perform well. It inquires how personalized law can be designed to deliver precision and justice and what pitfalls the regime would have to prudently avoid. In this book, Omri Ben-Shahar and Ariel Porat not only present this concept in a clear, easily accessible way, but they offer specific examples of how personalized law may be implemented across a variety of real-life applications.

**Christ and the Just Society in the Thought of Augustine** Apr 12 2021 Christ and the Just Society in the Thought of Augustine is a study of Augustine's political thought and ethics in relation to his theology. The book examines fundamental issues in Augustine's theological and political ethics in relation to the question, 'How did Augustine conceive the just society'? At the heart of the book's approach is the relationship that Augustine outlines in his City of God and other writings between Christ and those believers who acknowledge him to be the only source of the soul's virtue. The book demonstrates how Augustine sees Christ's grace and the scriptures contributing to the soul's growth in virtue, especially as these issues are framed by the Pelagian controversy. Finally, the implications which Augustine sees for Christ's mediation of virtue are examined in relation to his revision of the ancient concepts of heroism and the statesman.

**Capabilities in a Just Society** May 26 2022 A new theory of social justice arguing that people have rights to the core human capabilities necessary for 'navigational agency'.

**Living for a Just Society** Aug 05 2020 God is always working to bring about social justice in the world, and He invites us to join him. Living for a Just Society encourages each of us to take a more active role in social justice, across the street and around the world. A Guided Discovery of the Bible The Bible invites us to explore God's word and reflect on how we might respond to it. To do this, we need guidance and the right tools for discovery. The Six Weeks with the Bible series of Bible discussion guides offers both in a concise six-week format. Whether focusing on a specific biblical book or exploring a theme that runs throughout the Bible, these practical guides in this series provide meaningful insights that explain Scripture while helping readers make connections to their own lives. Each guide is faithful to Church teaching and is guided by sound biblical scholarship presents the insights of Church fathers and saints includes questions for discussion and reflection delivers information in a reader-friendly format gives suggestions for prayer that help readers respond to God's word appeals to beginners as well as to advanced students of the Bible By reading Scripture, reflecting on its deeper meanings, and incorporating it into our daily life, we can grow not only in our understanding of God's word, but also in our relationship with God."

**The Search for a Just Society** Jul 28 2022

**Just Health Care** Mar 12 2021 Norman Daniels examines the medical policies and health care dilemmas.

*Becoming Abolitionists* Jun 22 2019 A NONAME BOOK CLUB PICK Named a Kirkus Reviews "Best Book of 2021" "Becoming Abolitionists is ultimately about the importance of asking questions and our ability to create answers. And in the end, Purnell makes it clear that abolition is a labor of love—one that we can accomplish together if only we decide to." —Nia Evans, Boston Review For more than a century, activists in the United States have tried to reform the police. From community policing initiatives to increasing diversity, none of it has stopped the police from killing about three people a day. Millions of people continue to protest police violence because these "solutions" do not match the problem: the police cannot be reformed. In *Becoming Abolitionists*, Purnell draws from her experiences as a lawyer, writer, and organizer initially skeptical about police abolition. She saw too much sexual violence and buried too many friends to consider getting rid of police in her hometown of St. Louis, let alone the nation. But the police were a placebo. Calling them felt like something, and something feels like everything when the other option seems like nothing. Purnell details how multi-racial social movements rooted in rebellion, risk-taking, and revolutionary love pushed her and a generation of activists toward abolition. The book travels across geography and time, and offers lessons that activists have learned from Ferguson to South Africa, from Reconstruction to contemporary protests against police shootings. Here, Purnell argues that police can not be reformed and invites readers to envision new systems that work to address the root causes of violence. *Becoming Abolitionists* shows that abolition is not solely about getting rid of police, but a commitment to create and support different answers to the problem of harm in society, and, most excitingly, an opportunity to reduce and eliminate harm in the first place.

*The Common Good* Jan 10 2021 Robert B. Reich makes a powerful case for the expansion of America's moral imagination. Rooting his argument in common sense and everyday reality, he demonstrates that a common good constitutes the very essence of any society or nation. Societies, he says, undergo virtuous cycles that reinforce the common good as well as vicious cycles that undermine it, one of which America has been experiencing for the past five decades. This process can and must be reversed. But first we need to weigh the moral obligations of citizenship and carefully consider how we relate to honor, shame, patriotism, truth, and the meaning of leadership. Powerful, urgent, and utterly vital, this is a heartfelt missive from one of our foremost political thinkers.

**Toward a Just Society** Aug 29 2022 Joseph Stiglitz is one of the world's greatest economists. He has made fundamental contributions to economic theory in areas such as inequality, the implications of imperfect and asymmetric information, and competition, and he has been a major figure in policy making, a leading public intellectual, and a remarkably influential teacher and mentor. This collection of essays influenced by Stiglitz's work celebrates his career as a scholar and teacher and his aspiration to put economic knowledge in the service of creating a fairer world. *Toward a Just Society* brings together a range of essays whose breadth reflects how Stiglitz has shaped modern economics. The contributions to this volume, all penned by high-profile authors who have been guided by or collaborated with Stiglitz over the last five decades, span microeconomics, macroeconomics, inequality, development, law and economics, and public policy. Touching on many of the central debates and discoveries of the field and providing insights on the directions that academic economics could take in the future, *Toward a Just Society* is an extraordinary celebration of the many paths Stiglitz has opened for economics, politics, and public life.

*A Just Society* Oct 31 2022 What does a just society look like? Do we have to accept modern capitalist society with all of its inequality? Is there another way to ensure prosperity and dignity for all? These are some of the questions *A Just Society* seeks to answer through a deep examination of the past and present of the two most important socio-economic systems, socialism and capitalism. Professor David Dasic, professor Emeritus at the University of Belgrade, looks at delves into the history of socialism in the USSR and Yugoslavia, analyzing how and why Soviet and Yugoslav socialism failed, while the current hybrid socio-economic system in China continues to prosper. Professor Dasic examines the transition from socialism into capitalism in Eastern European countries after the fall of the Iron Curtain and stresses aspects of socialism that outperformed their capitalist replacements. *A Just Society* challenges our understanding of political and economic systems as immutable gospel. Professor Dasic urges us to give up our rigid reliance on partisan terminology and to explore a world that merges the advantages of capitalism with the social benefits of socialism to create a truly just society with dignity for all. Straightforward and clear to any reader, laymen or expert, conservative or liberal, *A Just Society* is a must read for anyone interested in broadening their understanding of socio-economic realities, challenging their worldview, and re-imagining the future as a fairer and more equitable society with open opportunities to all.

*Morality and Justice* Aug 17 2021 The essays in this book engage the original and controversial claims from Michael Boylan's *A Just Society*. Each essay discusses Boylan's claims from a particular chapter and offers a critical analysis of these claims. Boylan responds to the essays in his lengthy and philosophically rich reply.

**Justice for an Unjust Society** Nov 27 2019 This book presents a theory of justice whereby people living in radically unjust societies may transform such societies in the direction of justice. The identification of injustice is addressed since a radically unjust society may well conceal its injustice from its victims. The book considers a range of moral and pragmatic requirements of political action in the transformation of society. A special feature of this work of theory is that it is illustrated by troubling examples drawn from the history of South Africa. The case made here is that justice is not just for just societies. It is for all of us everywhere.

**Women, Philanthropy, and Social Change** Feb 20 2022 The definitive book on women and philanthropy—essential reading for scholars, students, donors, grantees, and philanthropists.

**The Catholic Social Imagination** Feb 29 2020 The reach of the Catholic Church is arguably greater than that of any other religion, extending across diverse political, ethnic, class, and cultural boundaries. But what is it about Catholicism that resonates so profoundly with followers who live under disparate conditions? What is it, for instance, that binds parishioners in America with those in Mexico? For Joseph M. Palacios, what unites Catholics is a sense of being Catholic—a social imagination that motivates them to promote justice and build a better world. In *The Catholic Social Imagination*, Palacios gives readers a feeling for what it means to be Catholic and put one's faith into action. Tracing the practices of a group of parishioners in Oakland, California, and another in Guadalajara, Mexico, Palacios reveals parallels—and contrasts—in the ways these ordinary Catholics receive and act on a church doctrine that emphasizes social justice. Whether they are building a supermarket for the low-income elderly or waging protests to promote school reform, these parishioners provide important insights into the construction of the Catholic social imagination. Throughout, Palacios also offers important new cultural and sociological interpretations of Catholic doctrine on issues such as poverty, civil and human rights, political participation, and the natural law.

*A Theory of Justice* Oct 19 2021 Though the revised edition of *A Theory of Justice*, published in 1999, is the definitive statement of Rawls's view, so much of the extensive literature on Rawls's theory refers to the first edition. This reissue makes the first edition once again available for scholars and serious students of Rawls's work.

**The Society of the Spectacle** Jul 24 2019 *The Society of the Spectacle* is a work of philosophy by Guy Debord. In it the author expands on the concept of the Spectacle, coupled with presentations of Marxist critical theory.

*American Schism* May 02 2020 An enlightened exploration of history to unite a deeply divided America The political dialogue in America has collapsed. Raw and bitter emotions such as anger and resentment have crowded out any logical debate. In this investigative tracing of our nation's divergent roots, author Seth David Radwell explains that only reasoned analysis and historical perspective can act as salves for the irrational political discourse that is raging at present. Two disparate Americas have always coexisted, and Radwell discovered that the surprising origin of these dual Americas was not an Enlightenment, but two distinct Enlightenments that have been fiercely competing since the founding of our country. Radwell argues that it is only by embracing Enlightenment principles that we can build a civilized, progressive, and tolerant society. *American Schism* reveals • the roots of the rifts in America since its founding and what is really dividing red and blue America; • the core issues that underlie all of today's bickering; • a detailed, effective plan to move forward, commencing what will be a long process of repair and reconciliation. Seth David Radwell changes the nature of the political debate by fighting unreason with reason, allowing Americans to firmly ground their differing points of view in rationality.

**A Just Society** Sep 29 2022 *A Just Society* represents a complete account of Boylan's original worldview theory of ethics and social philosophy. The author sets out the foundation and application of the personal worldview imperative (for ethics) and the shared community worldview imperative (for social philosophy). These form the structure for a rights-based deontological theory that is holistic and underscored by an understanding of the good will that incorporates novel depictions of the sincere and authentic agent who displays sympathy, care, openness, and love. In the end, *A Just Society* strikes a balance between extreme liberalism (libertarianism) and those advocating the rule of the general will (utilitarianism). As such, the book makes an important contribution to ethical and political theory, as well as grounding an original approach to public philosophy.

*Shadows of Ethics* Feb 08 2021 Collection of essays on our contemporary tendency to revisit Enlightenment concerns and the ways attributes of the 'highest'--reason, ethics, high cultural aesthetics, even theory--have become implicated with and confused with the 'lowes

**Privilege and Punishment** Jan 28 2020 How the attorney-client relationship favors the privileged in criminal court—and denies justice to the poor and to working-class people of color The number of Americans arrested, brought to court, and incarcerated has skyrocketed in recent decades. Criminal defendants come from all races and economic walks of life, but they experience punishment in vastly different ways. Privilege and Punishment examines how racial and class inequalities are embedded in the attorney-client relationship, providing a devastating portrait of inequality and injustice within and beyond the criminal courts. Matthew Clair conducted extensive fieldwork in the Boston court system, attending criminal hearings and interviewing defendants, lawyers, judges, police officers, and probation officers. In this eye-opening book, he uncovers how privilege and inequality play out in criminal court interactions. When disadvantaged defendants try to learn their legal rights and advocate for themselves, lawyers and judges often silence, coerce, and punish them. Privileged defendants, who are more likely to trust their defense attorneys, delegate authority to their lawyers, defer to judges, and are rewarded for their compliance. Clair shows how attempts to exercise legal rights often backfire on the poor and on working-class people of color, and how effective legal representation alone is no guarantee of justice. Superbly written and powerfully argued, *Privilege and Punishment* draws needed attention to the injustices that are perpetuated by the attorney-client relationship in today's criminal courts, and describes the reforms needed to correct them.

**Labour Markets, Institutions and Inequality** Mar 31 2020 Labour market institutions, including collective bargaining, the regulation of employment contracts and social protection policies, are instrumental for improving the well-being of workers, their families and society. In many countries, these instituti

**The Fair Society** Nov 07 2020 We've been told, again and again, that life is unfair. But what if we're wrong simply to resign ourselves to this situation? What if we have the power—and more, the duty—to change society for the better? We do. And our very nature inclines us to do so. That's the provocative argument Peter Corning makes in *The Fair Society*. Drawing on the evidence from our evolutionary history and the emergent science of human nature,

Corning shows that we have an innate sense of fairness. While these impulses can easily be subverted by greed and demagoguery, they can also be harnessed for good. Corning brings together the latest findings from the behavioral and biological sciences to help us understand how to move beyond the Madoffs and Enrons in our midst in order to lay the foundation for a new social contract—a Biosocial Contract built on a deep understanding of human nature and a commitment to fairness. He then proposes a sweeping set of economic and political reforms based on three principles of fairness—equality, equity, and reciprocity—that together could transform our society and our world. At this crisis point for capitalism, Corning reveals that the proper response to bank bailouts and financial chicanery isn't to get mad—it's to get fair.

*Policies for a Just Society* Jun 26 2022 Why are western societies - and particularly Britain - becoming more deeply divided, more violent, more squalid? What traditions can we draw upon to respond to this crisis? Since present politics led by central governments offer scant hope of radical reform, what can be done by those determined to work at a local scale to resist and reverse these trends? Donnison draws on the experience of innovative civic leaders, community activists, local policy-makers and researchers to answer these pressing questions.

*Hard Heads, Soft Hearts* Jun 02 2020 A hard-headed liberal economist, Alan Blinder clearly shows how economic policy is made in America and how good policies often make bad politics. He discusses liberal-conservative divisiveness and shows how it often prevents sound economic advice from being heeded. Blinder offers his own nonpartisan vision for the future of our economic society and challenges law-makers—Democrats and Republicans—to do better.

**Non-Negotiable** Sep 25 2019

What gave Abraham Lincoln the authority to declare the freedom and choice to own slaves as immoral? After all, the law of the land allowed it. What gave Rev. Dr. Martin Luther King the authority to lead a whole movement calling civil laws immoral and demanding new civil rights laws that recognized the equal dignity and worth of "all God's children" without exception? After all, segregation was legal. What gave the United Nations the moral authority to claim and designate absolute human rights in an international declaration, though some member nations were already violating them?

Principles. First principles. In their founding documents, the United States and the United Nations recognized the principles that all men have inherent dignity and that they deserve equal rights. They both have declared those principles the conditions fundamental to freedom, justice, and peace. Yet both the United States and the United Nations have within them powerful political forces passing laws or resolutions that violate first principles and put at risk the most vulnerable populations.

This book goes beyond the politics of pragmatism and cultural relativism to reacquaint the reader with first principles. It demonstrates what the Church has to say about the most important issues of our time and why. It anticipates the questions readers will ask and provides the answers they will need in the struggle to restore respect for human dignity.

**Transcendent God, Rational World** Dec 29 2019 Ramon Harvey revisits the Muslim theologian Ab? Man??r al-M?tur?d? (d. 333/944) from Samarqand and puts his system, and that of the M?tur?d? school, into lively dialogue with modern thought to show that a contemporary Muslim philosophical theology (kal?m jad?d) can provide original and constructive answers to perennial theological questions.

*Justice* Sep 05 2020 A renowned Harvard professor's brilliant, sweeping, inspiring account of the role of justice in our society--and of the moral dilemmas we face as citizens What are our obligations to others as people in a free society? Should government tax the rich to help the poor? Is the free market fair? Is it sometimes wrong to tell the truth? Is killing sometimes morally required? Is it possible, or desirable, to legislate morality? Do individual rights and the common good conflict? Michael J. Sandel's "Justice" course is one of the most popular and influential at Harvard. Up to a thousand students pack the campus theater to hear Sandel relate the big questions of political philosophy to the most vexing issues of the day, and this fall, public television will air a series based on the course. Justice offers readers the same exhilarating journey that captivates Harvard students. This book is a searching, lyrical exploration of the meaning of justice, one that invites readers of all political persuasions to consider familiar controversies in fresh and illuminating ways. Affirmative action, same-sex marriage, physician-assisted suicide, abortion, national service, patriotism and dissent, the moral limits of markets—Sandel dramatizes the challenge of thinking through these con?icts, and shows how a surer grasp of philosophy can help us make sense of politics, morality, and our own convictions as well. Justice is lively, thought-provoking, and wise—an essential new addition to the small shelf of books that speak convincingly to the hard questions of our civic life.

*Technological Slavery (Large Print 16pt)* Aug 24 2019 Theodore Kaczynski saw violent collapse as the only way to bring down the techno-industrial system, and in more than a decade of mail bomb terror he killed three people and injured 23 others. One does not need to support the actions that landed Kaczynski in supermax prison to see the value of his essays disabusing the notion of heroic technology while revealing the manner in which it is destroying the planet. For the first time, readers will have an uncensored personal account of his anti-technology philosophy, including a corrected version of the notorious "Unabomber Manifesto," Kaczynski, s critique of anarcho-primitivism, and essays regarding "the Coming Revolution."

**Towards a Natural Social Contract** Jul 04 2020 This open access book is a 2022 Nautilus Gold Medal winner in the category "World Cultures' Transformational Growth & Development". It states that the societal fault lines of our times are deeply intertwined and that they confront us with challenges affecting the security, fairness and sustainability of our societies. The author, Prof. Dr. Patrick Huntjens, argues that overcoming these existential challenges will require a fundamental shift from our current anthropocentric and economic growth-oriented approach to a more ecocentric and regenerative approach. He advocates for a Natural Social Contract that emphasizes long-term sustainability and the general welfare of both humankind and planet Earth. Achieving this crucial balance calls for an end to unlimited economic growth, overconsumption and over-individualisation for the benefit of ourselves, our planet, and future generations. To this end, sustainability, health, and justice in all social-ecological systems will require systemic innovation and prioritizing a collective effort. The Transformative Social-Ecological Innovation (TSEI) framework presented in this book serves that cause. It helps to diagnose and advance innovation and spur change across sectors, disciplines, and at different levels of governance. Altogether, TSEI identifies intervention points and formulates jointly developed and shared solutions to inform policymakers, administrators, concerned citizens, and professionals dedicated towards a more sustainable, healthy and just society. A wide readership of students, researchers, practitioners and policy makers interested in social innovation, transition studies, development studies, social policy, social justice, climate change, environmental studies, political science and economics will find this cutting-edge book particularly useful. "As a sustainability transition researcher, I am truly excited about this book. Two unique aspects of the book are that it considers bigger transformation issues (such as societies' relationship with nature, purpose and justice) than those studied in transition studies and offers analytical frameworks and methods for taking up the challenge of achieving change on the ground." - Prof. Dr. René Kemp, United Nations University and Maastricht Sustainability Institute

*A Republic of Equals* Apr 24 2022 In this provocative book, economist Jonathan Rothwell draws on the latest empirical evidence from across the social sciences to demonstrate how rich democracies have allowed racial politics and the interests of those at the top to subordinate justice. He looks at the rise of nationalism in Europe and the United States, revealing how this trend overlaps with racial prejudice and is related to mounting frustration with a political status quo that thrives on income inequality and inefficient markets. But economic differences are by no means inevitable. Differences in group status by race and ethnicity are dynamic and have reversed themselves across continents and within countries. Inequalities persist between races in the United States because Black Americans are denied equal access to markets and public services. Meanwhile, elite professional associations carve out privileged market status for their members, leading to compensation in excess of their skills.

*Talking Criminal Justice* Jan 22 2022 The words we use to talk about justice have an enormous impact on our everyday lives. As the first in-depth, ethnographic study of language, Talking Criminal Justice examines the speech of moral entrepreneurs to illustrate how our justice language encourages social control and punishment. This book highlights how public discourse leaders (from both conservative and liberal sides) guide us toward justice solutions that do not align with our collectively professed value of "equal justice for all" through their language habits. This contextualized study of our justice language demonstrates the concealment of intentions with clever language use which mask justice ideologies that differ greatly from our widely espoused justice values. By the evidence of our own words Talking Criminal Justice shows that we consistently permit and encourage the construction of people in ways which attribute motives that elicit and empower social control and punishment responses, and that make punitive public policy options acceptable. This book will be of interest to academics, students and professionals concerned with social and criminal justice, language, rhetoric and critical criminology.

**Radical Markets** Nov 19 2021 Revolutionary ideas on how to use markets to achieve fairness and prosperity for all Many blame today's economic inequality, stagnation, and political instability on the free market. The solution is to rein in the market, right? Radical Markets turns this thinking on its head. With a new foreword by Ethereum creator Vitalik Buterin and virtual reality pioneer Jaron Lanier as well as a new afterword by Eric Posner and Glen Weyl, this provocative book reveals bold new ways to organize markets for the good of everyone. It shows how the emancipatory force of genuinely open, free, and competitive markets can reawaken the dormant nineteenth-century spirit of liberal reform and lead to greater equality, prosperity, and cooperation. Only by radically expanding the scope of markets can we reduce inequality, restore robust economic growth, and resolve political conflicts. But to do that, we must replace our most sacred institutions with truly free and open competition—Radical Markets shows how.

**Towards an Eco-just Society** Sep 17 2021 With reference to India.

**Reframed** Jun 14 2021 For Stuart Shanker, the possibility of a truly just and free society begins with how we see and nurture our children. Shanker is renowned for using cutting-edge neuroscience to help children feel happy and think clearly by better regulating themselves. In his new book, Reframed, Shanker explores self-regulation in wider, social terms. Whereas his two previous books, Calm, Alert, and Learning and Self-Reg, were written for educators and parents, Reframed, the final book in the trilogy, unpacks the unique science and conceptual practices that are the very lifeblood of Self-Reg, making it an accessible read for new Self-Reggers. Reframed is grounded in the three basic principles of Shanker Self-Reg®: - There is no such thing as a bad, lazy, or stupid kid. - All people can learn to self-regulate in ways that promote rather than constrict growth. - There is no such thing as a "fixed outcome": trajectories can always be changed, at any point in the lifespan, if only we have the right knowledge and tools. Only a society that embraces these principles and strives to practice them, argues Shanker, can become a truly just society. The paradigm revolution presented in Reframed not only helps us understand the harrowing time we are living through, but inspires a profound sense of hope for the future. Shanker shows us how to build a compassionate society, one mind at a time.

*Just Financial Markets?* Jul 16 2021 "Well-functioning financial markets are crucial for the economic well-being and the justice of contemporary societies. The Great Financial Crisis has shown that a perspective that naively trusts in the self-regulating powers of free markets cannot capture what is at stake in understanding and regulating financial markets. The damage done by the Great Financial Crisis, including its distributive consequences, raises serious questions about the justice of financial markets as we know them. This volume brings together leading scholars from political theory, law, and economics in order to explore the relation between justice and financial markets. Broadening the perspective from a purely economic one to a liberal egalitarian one, the volume explores foundational normative questions about how to conceptualize justice in relation to financial markets, the biases in the legal frameworks of financial markets that produce unjust outcomes, and perspectives of justice on specific institutions and practices in contemporary financial markets. Written in a clear and accessible language, the volume presents analyses of how financial markets (should) function and how the Great Financial Crisis came about, proposals for how the structures of financial markets could be reformed, and analysis of why reform is not happening at the speed that would be desirable from a perspective of justice."--Publisher's website.

*The Idea of Justice* Dec 09 2020 Presents an analysis of what justice is, the transcendental theory of justice and its drawbacks, and a persuasive argument for a comparative perspective on justice that can guide us in the choice between alternatives.
