Endangered Minds Apr 27 2022 Is today's fast-paced media culture creating a toxic environment for our children's brains? In this landmark, bestselling assessment tracing the roots of America's escalating crisis in education, Jane M. Healy, Ph.D., examines how television, video games, and other components of popular culture compromise our children's ability to concentrate and to absorb and analyze information. Drawing on neuropsychological research and an analysis of current educational practices, Healy presents in clear, understandable language: -- How growing brains are physically shaped by experience -- Why television programs -- even supposedly educational shows like *Sesame Street* -- develop "habits of mind" that place children at a disadvantage in school -- Why increasing numbers of children are diagnosed with attention deficit disorder -- How parents and teachers can make a critical difference by making children good learners from the day they are born

The Madness of Women Jan 25 2022 Nominated for the 2012 Distinguished Publication Award of the Association for Women in Psychology! Why are women more likely to be positioned or diagnosed as mad than men? If madness is a social construction, a gendered label, as many feminist critics would argue, how can we understand and explain women's prolonged misery and distress? In turn, can we prevent or treat women's distress, in a non-pathologising women centred way? *The Madness of Women* addresses these questions through a rigorous exploration of the myths and realities of women's madness. Drawing on academic and clinical experience, including case studies and in-depth interviews, as well as on the now extensive critical literature in the field of mental health, Jane Usher presents a critical multifactorial analysis of women's madness that both addresses the notion that madness is a myth, and yet acknowledges the reality and multiple causes of women's distress. Topics include: The genealogy of women's madness – incarceration of difficult or deviant women Regulation through treatment Deconstructing depression, PMS and borderline personality disorder Madness as a reasonable response to objectification and sexual violence Women's narratives of resistance This book will be of great interest to students and scholars of psychology, gender studies, sociology, women's studies, cultural studies, counselling and nursing.

Welcome to Orphancorp Mar 03 2020 Winner of the 2015 Seizure Viva La Novella Prize 'Takes all of your dystopian nightmares and connects them to a mother lode of pure emotional intensity. There's so much keen detail here about the cruel logic of oppressive institutions, you'll feel Mirii's yearning for freedom in your bones – and you'll rejoice at every tiny moment of escape that she achieves. Welcome to Orphancorp is harrowing, scarily real, and ultimately super moving.' – Charlie Jane Anders (i09) 'Punchy, crunchy, sexy and smart, Welcome to Orphancorp is a short, sharp shock of a story with bruised-but-not-broken characters and a bonsai dystopia you can actually believe in. Marlee Jane Ward is a writer of heart and passion, muscle and slow-burning anger.' – Ian McDonald 'Welcome to Orphancorp is an intimate, heartfelt story set in the darkest of places. I can't stop thinking about these characters.' – Kij Johnson 'An object lesson in how to dehumanise young people by locking them up and depriving them of all warmth and care – has never been more timely. It will make your jaw clench with fear for the indomitable Mirii Mahoney, and your fist punch the air at her every tiny victory.' – Margo Lanagan

Failure to Connect Nov 03 2022 In this comprehensive, practical, and unsettling look at computers in children's lives, Jane M. Healy, Ph.D., questions whether computers are really helping or harming children's development. Once a bedazzled enthusiast of educational computing but now a troubled skeptic, Dr. Healy examines the advantages and drawbacks of computer use for kids at home and school, exploring its effects on children's health, creativity, brain development, and social and emotional growth. Today, the Federal Government allocates scarce educational funding to wire every classroom to the Internet, software companies churn out "educational" computer programs even for preschoolers, and school administrators cut funding and space for books, the arts, and physical education to make room for new computer hardware. It is past the time to address these issues. Many parents and even some educators have been sold on the idea that computer literacy is as important as reading and math. Those who haven't hopped on the techno bandwagon are left wondering whether they are shortchanging their children's education or their students' futures. Few people stop to consider that computers, used incorrectly, may do far more harm than good. New technologies can be valuable educational tools when used in age-appropriate ways by properly trained teachers. But too often schools budget insufficiently for teacher training and technical support. Likewise, studies suggest that few parents know how to properly assist children's computer learning; much computer time at home may be wasted time, drawing children away from other developmentally important activities such as reading, hobbies, or creative play. Moreover, Dr. Healy finds that much so-called learning software is more "edutainment" than educational, teaching students more about impulsively pointing and clicking for some trivial goal than about how to think, to communicate, to imagine, or to solve problems. Some software, used without careful supervision, may also have the potential to interrupt a child's internal motivation to learn. *Failure to Connect* is the first book to link children's technology use to important new findings about stages of child development and brain maturation, which are clearly explained throughout. It illustrates, through dozens of concrete examples and guidelines, how computers can be used successfully with children of different age groups as supplements to classroom curricula, as research tools, or in family projects. Dr. Healy issues strong warnings, however, against too early computer use, recommending little or no exposure before age seven, when the brain is primed to take on more abstract challenges. She also lists resources for reliable reviews of child-oriented software, suggests questions parents should ask when their children are using computers in school, and discusses when and how to manage computer use at home. Finally, she offers a thoughtful look at the question of which skills today's children will really need for success in a technological future -- and how they may best acquire them. Based on years of research into learning and hundreds of hours of interviews and observations with school administrators, teachers, parents, and students, *Failure to Connect* is a timely and eye-opening examination of the central questions we must confront as technology increasingly influences the way we educate our children.

The Book of Jane Oct 22 2021 The Book of Jane is a perceptive, tenacious investigation of gender, authority, and art. Jennifer Habel draws a contrast between the archetype of the lone male genius and the circumscribed, relational lives of women. Habel points repeatedly to discrepancies of scale: the grand arenas of Balanchine, Einstein, and Matisse are set against the female miniature—the dancer's stockings, the anonymous needlepoint, the diary entry, the inventory of a purse.

Blagodaria, Bulgaria Aug 20 2021 Wanting to reside somewhere in Eastern Europe for a while, curious to learn how that region was faring after the fall of the wall, the author and her husband taught at the American College of Sofia from 1998 to 2000 in Sofia, Bulgaria, the oldest active American high school outside of the United States, founded in 1860, closed during the fifty years of Communist rule, and reopened in 1991. "Blagodaria, Bulgaria" is the account of their intense, challenging, poignant two years living in a villa with other teachers in a wacky, unique school that shared its campus with a police training academy and never knew when it was going to be ordered to close down, and in a wacky, closed country struggling with the residue of Communism—corruption, poverty, work ethic, unplowed streets, among a people known for pessimism but who had a turbulent history and an uncertain future. Their remarkable, endearing students, some of the brightest in the country and learning to learn by critical thinking rather than rote memorization, have dreams of a different life, many of them going on to prestigious American universities. Despite the all-encompassing demands of the school, the author manages to explore the cultural and historical delights in the old city and travel around the beautiful, diverse countryside of dry plains, rugged mountain ranges, Black Sea coast, villages and vineyards. One summer is spent backpacking through more countries of Eastern Europe, with their accompanying transitions, and during school breaks there are trips to the Mideast and South Africa. Fifteen years after leaving it, the author returned to Bulgaria, which was still in ferment but opening up to the rest of the world and much changed.

Fiona and Jane Mar 15 2021 A TIME, NPR, VOGUE, OPRAH DAILY, AND VULTURE BEST BOOK OF THE YEAR (SO FAR) "Ho's debut work is the perfect modern example of great American fiction. . . . You will love it." —Jake Tapper "Intimate, cinematic. . . . The world Ho creates between the two women feels like one friend reading the other's story, wishing she were there." —The New York Times Book Review "[Fiona and Jane] is about an incredible lifelong friendship between two Asian American women growing up in Southern California—absolutely adored that book." —Ailsa Chang, NPR's "All Things Considered" "Intricately rendered. . . . Fiona and Jane celebrates a woman's ability to be late, to show up in their own lives when and where they want to, to change their minds, to be lonely and to be in love, and to be respected regardless." —The Washington Post A witty, warm, and irreverent book that traces the lives of two young Taiwanese American women as they navigate friendship, sexuality, identity, and heartbreak over two decades. Best friends since second grade, Fiona Lin and Jane Shen explore the lonely freeways and seedy bars of Los Angeles together through their teenage years, surviving unfulfilling romantic encounters, and carrying with them the scars of their families' tumultuous pasts. Fiona was always destined to leave, her effortless beauty burnished by fierce ambition—qualities that Jane admired and feared in equal measure. When Fiona moves to New York and cares for a sick friend through a breakup with an opportunistic boyfriend, Jane remains in California and grieves her estranged father's sudden death, in the process alienating an overzealous girlfriend. Strained by distance and unintended betrayals, the women float in and out of each other's lives, their friendship both a beacon of home and a reminder of all they've lost. In stories told in alternating voices, Jean Chen Ho's debut collection peels back the layers of female friendship—the intensity, resentment, and boundless love—to probe the beating hearts of young women coming to terms with themselves, and each other, in light of the insecurities and shame that holds them back. Spanning countries and selves, Fiona and Jane is an intimate portrait of a friendship, a deep dive into the universal perplexities of being young and alive, and a bracingly honest account of two Asian women who dare to stake a claim on joy in a changing, contemporary America. Sutton's Law May 17 2021 There's a brand new health care system at Texas University Regional Preventive Healthcare - EquaCare, an ideal marriage of medicine & economics. However, in internist Maggie Altman's opinion, it

Her quest for the truth of what happened to Post leads her into the inner workings of the new EquaCare system & ultimately to a horrifying conclusion: that someone is meddling with EquaCare at TURPH, someone to whom patients are just assets or liabilities to be managed for maximum profit. She has a short list of suspects: Steven Blaine, chief resident & king of the computer printouts who roams the halls of TURPH at night; & Milton Silber, former professor of medicine who claims to have no interest in EquaCare or medicine any longer but who, nonetheless, makes clandestine visits to TURPH. Finally, when an attempt is made on her life, Maggie realizes that she's attracted the attention of someone very powerful, someone whose identity she'd better uncover before there's another death at TURPH - hers.

I fled from Texas to New York to become somebody and found a home at one of the most prestigious magazines in the country. It's the Chronicle's fiftieth anniversary, and my boss is finally giving me the opportunity to become managing editor. There's only one problem... He's also hired some Cornell-grad frat boy under the guise he's here to help me become a better journalist. [MJE1] I'm not an idiot. Frat boy isn't here out of the kindness of his heart. He's here to steal the job I've worked a decade for. No, sir. Not on my watch. No one will take something I've rightfully earned. But Mr. Cornell isn't just some guy. He's the same gorgeous man I had a two-night stand with. WIL Norah was everything I was looking for to help heal my broken heart, and I planned on ending the serial monogamist title my college roommates gave me with her. No strings attached. But one night became two, and even then, that wasn't enough. She wasn't supposed to be my next relationship, and when I walked in as the new reporter at the Chronicle, she definitely wasn't supposed to be my competition for the managing editor job. I like Norah, but there's no way I would sacrifice a job I moved across the country to get for a woman I just met. No matter how much I can't stop thinking about her.

Edge of Empire Feb 11 2021 Edge of Empire examines struggles over urban space in three contemporary first world cities in an attempt to map the real geographies of colonialism and postcolonialism as manifest in modern society. From London, the one-time heart of the empire, to Perth and Brisbane, scenes of Aboriginal claims for the sacred in the space of the modern city, Jacobs emphasises the global geography of the local and unravels the spatialised cultural politics of postcolonial processes. Edge of Empire forms the basis for understanding imperialism over space and time, and is a recognition of the unruly spatial politics of race and nation, nature and culture, past and present.

Mapping the Bones Nov 10 2020 From the best-selling and award-winning author of The Devil's Arithmetic, Jane Yolen, comes her first Holocaust novel in nearly thirty years. Influenced by Dr. Mengele's sadistic experimentations, this story follows twins as they travel from the Lodz ghetto, to the partisans in the forest, to a horrific concentration camp where they lose everything but each other. It's 1942 in Poland, and the world is coming to pieces. At least that's how it seems to Chaim and Gittel, twins whose lives feel like a fairy tale torn apart, with evil witches, forbidden forests, and dangerous ovens looming on the horizon. But in all darkness there is light, and the twins find it through Chaim's poetry and the love they have for each other. Like the bright flame of a Yahrzeit candle, his words become a beacon of memory so that the children and grandchildren of survivors will never forget the atrocities that happened during the Holocaust. Filled with brutality and despair, this is also a story of poetry and strength, in which a brother and sister lose everything but each other. Nearly thirty years after the publication of her award-winning and bestselling The Devil's Arithmetic and Briar Rose, Yolen once again returns to World War II and captivates her readers with the authenticity and power of her words. Praise for Mapping the Bones: "Jane Yolen's Mapping the Bones is a swift and deadly drama with overtones of dark fable we all wish we could forget. But this book, a shining star held in a trembling palm, requires us to remember." --Gregory Maguire, internationally bestselling author of Wicked "Mapping the Bones is spare and beautiful and haunting. Jane Yolen has created a masterpiece." --Kimberly Brubaker Bradley, New York Times bestselling author of The War That Saved My Life "Master storyteller Jane Yolen has outdone herself. This is a compelling, important, and timely book that deserves the widest audience possible." --Lesléa Newman, award-winning author of Still Life with Buddy "In the hands of the superb Jane Yolen, folklore and fact connect in a harrowing testimony to horror and to love. Speaking of Jane Roberts Sep 08 2020 Poet, novelist, author of the Seth Material, Jane Roberts's books have sold over 7.5 million copies. She was one of the most important psychics of the twentieth century. Now, Speaking of Jane Roberts reveals a woman as fascinating as the material she produced. Susan Watkins and Jane Roberts were friends for sixteen years. Early on, Seth, the entity who spoke through Roberts, told the two women that they were counterparts, connected in this particular lifetime to work out some shared personal issues. In addition to being a compassionate and sometimes painfully honest look at Roberts's life—her difficult childhood, her constant questioning of psychic abilities and sources of creativity, her resistance to Seth's advice, her dramatic struggles with her health. Speaking of Jane Roberts is also a beautiful and applicable illustration of the counterpart relationship. The connection that Watkins and Roberts shared reveals something important about the power and mystery of the connections we all share with the people closest to us. * Watkins also offers original insights into the phenomenon of channeling.
