Mikoyan-Gurevich MiG-21 Pilot's Flight Operating Instructions Mar 15 2021 The Mikoyan-Gurevich MiG-21 is known in NATO circles as the ‘Fishbed’. Designed as a Mach 2.0 interceptor, the plane holds the distinction of being produced in greater numbers than any other jet aircraft. The Fishbed flew in combat in Vietnam, where it held its own against the F-105 Thunderchief. During the 1973 Arab-Israeli War, 17 Israeli aircraft were shot down, for a loss of six Egyptian MiG-21s. The plane also flew in combat in the Indo-Pakistani War of 1971, during the Soviet invasion of Afghanistan, and in Yugoslavia. Today, over 28 of the world’s air forces continue to fly MiG-21s. Originally printed by NATO, this English-language handbook provides a glimpse inside the cockpit of this incredible plane. The manual was recently declassified and is here reprinted in book form. Care has been taken to preserve the integrity of the text

In Honda K-Series Engine Swaps, author Aaron Bonk guides you through all the details, facts, and figures you will need to complete a successful K-Series swap into your older chassis. History of Maintenance of Indian Air Force 1977-2016 Feb 11 2021 IAF from its humble beginning in 1932 has transformed itself into fourth largest AF operating at frontiers of technologies with multi-dimensional capabilities and a potent force to reckon with. It is said that the history is written by winners. But what is important is that the history is documented impartially, objectively and factually, as much as possible. It may be worth for IAF to consider coming out with a book each on Operations, Maintenance and Administration, depicting the historical decisions taken - successes and failures in equal measure - and how the IAF progressed over the decades to be what it is today - a professionally managed, optimally exploited, synergistically working and one of the most effective instruments of national power to ensure accomplishing objectives of the nation. Yes, coffee table books and anniversary issues do gloss over a few events, but the real history is made by the toil, blood and sweat and tears of the men behind these operations. Individual awards and citations many times compromise on actualities and are miserly with truth. “History is an argument without an end” said Pieter Geyl the Dutch historian. “I am glad to recommend this book to all, as the readers of the book, irrespective of their background, will enjoy the journey of these ‘spanners and screwdrivers’ of 12 AEC covering almost 900 man-years of IAF maintenance. It is also bound to raise curiosity in many minds to know more about air force maintenance. The book may act as a lighthouse for a lot of the present serving aeronautical engineers in their progression.” – Air Marshal KS Bhatia, PVSM AVSM & BAR “40 years of IAF maintenance history told through the voices of 39 outstanding air force officers with an unsurpassed breadth of experience and accomplishments. Most inspiring.” – Ramesh Dontha, Author of The 60-Minute Startup series of books, 3 times bestselling author, Gold Medal Award winner in 2020 Reader’s Favorite International Competition (Marketing)
