Computational Management Feb 19 2022 This book offers a timely review of cutting-edge applications of computational intelligence to business management and financial analysis. It covers a wide range of intelligent and optimization techniques, reporting in detail on their application to real-world problems relating to portfolio management and demand forecasting, decision making, knowledge acquisition, and supply chain scheduling and management.

Providing Relationships and Sex Education for Special Learners Mar 08 2021 Effective Relationships and Sex Education (RSE) provision is a right for all learners, yet it often proves challenging for educators and caregivers, particularly those teaching learners with additional needs. This book provides practical guidance for teachers and Special Educational Needs Coordinators (SENCOs) who require the knowledge, skills and confidence to deliver effective RSE to young people with Special Educational Needs. It offers both specific support tailored to pupils with Profound & Multiple Learning Difficulties (PMLD) and Severe Learning Difficulties (SLD), Down's Syndrome and Autism, as well as broad support to embed a whole-school approach in mainstream and special settings. Chapters guide the reader through a range of key topics, with advice, strategies and ready-to-use resources to teach RSE in a positive and respectful way. This much-needed book will be invaluable for education professionals, residential care providers, and anybody looking to support young people with Special Educational Needs as they learn about relationships and sex. It will also help schools to meet statutory requirements covering the delivery of Relationships and Sex Education.

Financial Signal Processing and Machine Learning Oct 03 2020 The

modern financial industry has been required to deal with large and diverse portfolios in a variety of asset classes often with limited market data available. *Financial Signal Processing and Machine Learning* unifies a number of recent advances made in signal processing and machine learning for the design and management of investment portfolios and financial engineering. This book bridges the gap between these disciplines, offering the latest information on key topics including characterizing statistical dependence and correlation in high dimensions, constructing effective and robust risk measures, and their use in portfolio optimization and rebalancing. The book focuses on signal processing approaches to model return, momentum, and mean reversion, addressing theoretical and implementation aspects. It highlights the connections between portfolio theory, sparse learning and compressed sensing, sparse eigen-portfolios, robust optimization, non-Gaussian data-driven risk measures, graphical models, causal analysis through temporal-causal modeling, and large-scale copula-based approaches. Key features: Highlights signal processing and machine learning as key approaches to quantitative finance. Offers advanced mathematical tools for high-dimensional portfolio construction, monitoring, and post-trade analysis problems. Presents portfolio theory, sparse learning and compressed sensing, sparsity methods for investment portfolios. including eigen-portfolios, model return, momentum, mean reversion and non-Gaussian data-driven risk measures with real-world applications of these techniques. Includes contributions from leading researchers and practitioners in both the signal and information processing communities, and the quantitative finance community.

Advancing Culture of Living with Landslides Aug 25 2022 This volume contains peer-reviewed papers from the Fourth World Landslide

Forum organized by the International Consortium on Landslides (ICL), the Global Promotion Committee of the International Programme on Landslides (IPL), University of Ljubljana (UL) and Geological Survey of Slovenia in Ljubljana, Slovenia from May 29 to June 2, 2017. The complete collection of papers from the Forum is published in five full-color volumes. This fifth volume contains the following: • Landslide Interactions with the Built Environment • Landslides in Natural Environment • Landslides and Water • Landslides as Environmental Change Proxies: Looking at the Past • Student Papers Prof. Matjaž Mikoš is the Forum Chair of the Fourth World Landslide Forum. He is the Vice President of International Consortium on Landslides and President of the Slovenian National Platform for Disaster Risk Reduction. Assoc. Prof. Vít Vilímek is the editor of Volume 5. He is member of the Evaluation committee of International Consortium on Landslides and head of the Czech Geomorphological Association. Prof. Yueping Yin is the President of the International Consortium on Landslides and the Chairman of the Committee of Geo-Hazards Prevention of China, and the Chief Geologist of Geo-Hazard Emergency Technology, Ministry of Land and Resources, P.R. China. Prof. Kyoji Sassa is the Founding President of the International Consortium on Landslides (ICL). He is Executive Director of ICL and the Editor-in-Chief of International Journal "Landslides" since its foundation in 2004. IPL (International Programme on Landslides) is a programme of the ICL. The programme is managed by the IPL Global Promotion Committee including ICL and ICL supporting organizations, UNESCO, WMO, FAO, UNISDR, UNU, ICSU, WFEO, IUGS and IUGG. The IPL contributes to the United Nations International Strategy for Disaster Reduction and the ISDR-ICL Sendai Partnerships 2015-2025. **Studies Combined: Cyber Warfare In Cyberspace - National**

The Glaciation of High Asia May 30 2020 This book summarizes four decades of glacial-geomorphological field research in Central and High Asia in an attempt to draw a significant link between Quaternary science research and paleoclimatology. Based on the latest geomorphological findings, this study offers a large-scale reconstruction of the Last Glacial Maximum (LGM) that in High Asia encompassed a total expanse of no less than three million km², including the Central Tibetan plateau with 2.4 million km². The author offers a complete reconstruction of the Late Glacial, Holocene, and Historical glacier advances as well as the successive Postglacial ablation stages extending to the present. Taken together, the findings presented here provide the first insights into a global-climatic impact of the Last Glacial Maximum in Central and High Asia with respect to the current interglacial stage. The comparative data analyses point to an inland glaciation at subtropical latitude covering an area larger than the Nordic inland glaciation in Greenland. These insights are facilitated by a methodological approach, unprecedented in modern Quaternary research, that combines high-quality panoramic photography with high-resolution satellite imagery. This combination of terrestrial and aerial perspectives enables scientists and readers alike to visualize the geomorphology of the landscape as a three-dimensional space. The author's successful union of digital big data resources with classical geomorphological analysis offers an exciting new template for future research in Quaternary science and related fields.

Unbundling the University Curriculum Sep 14 2021 In a context in which explicit attention to the curriculum has been sidelined in universities strategy, this book makes an argument for why curriculum

matters, both in understanding the effects of unbundled online learning and more broadly. It takes up two particular curriculum issues which are amplified in an unbundled context: differences in the formulation of curriculum between disciplines and professional fields, and the extent these are recognised in university strategy; and the push for constructivist pedagogies, and its effects on curriculum construction. Since the onslaught of MOOCs in 2012, unbundled forms of online learning offered via partnerships with external online program management and MOOC providers have grown significantly across the university sector. There has been much debate about the implications of these partnerships but the focus has predominantly been on the engagement of students and their learning. This book takes a different and novel approach, looking instead at the effects on curriculum and knowledge. Drawing on selected case studies, the book reflects on how university leaders and academics engaged with MOOCs and other forms of unbundled online learning in the early 2010s, and the effects of these reforms on curriculum practice. It captures in detail the complex and difficult work involved in university curriculum making in a way rarely seen in discussions of higher education. And it generates new in-sights about some of the critical problems manifest in the ongoing moves to embrace unbundled online learning today.

Dr Rose Jan 18 2022 In these books, you can follow Dr. Rose M. Peterson, 37 years, who suffered disappointments at home and thought to run away from these problems for some time. Naive, young and adventurous, but at the same time educated to help people in need, she took service for MSF.(Medicine Sans Frontieres) (Doctors without border) very secret mission when she was to serve in the war's Syria and was placed in Aleppo. What happened then you can read about in the book by following all the e-mails that she and I have written to each other. Read about her dreams and disappointments in life. Her homesickness, the joy to leave Aleppo and all the problems that followed. and all greedy people, and the bureaucracy that follows this story When MSF. (Doctors without border) mission was completed, Dr. Rose M. Peterson was obtained a large sum of money for the work, which was converted into a private fund that I was appointed by her to be the beneficiary of the fund until she could leave the hospital and she gets control over it. This fund would now be transported through England and through banking world of Europe and the Europe Central Bank (ECB). Now you can follow the fund through 48 different financial institutions/departments, and how one Bank, SWEDBANK in Sweden by all means tries to steal the fund. How it resolves or not, you can read about in the book. Follow the progress of the story by reading all the mails that have been sent and received. This book reveals banking world that no outsider understands. Thanks for everyone who helped her anonymously to lend her money to be able to save her fund, her compensation in money for all work in MSF. Follow the dramatic story from the first contact 2013 to the end of 2019. Everything that happens in MSF and the banking world is secret, everyone has a Professional secrecy. I have no duty of confidentiality and you can read my emails. You can read my

Nine Horrible Days the Story of the Kidnap of Archbishop

Kathey Mar 28 2020 It was like thick darkness during the day; not an eclipse that is predicted months and days ahead, but an unexpected event, very unexpected. The fact that one serves God Almighty does not exempt him from problems, suffering etc. Job in the Bible was a righteous man, yet, he had his own share of tribulations. It is in such situations that God demonstrates His power. Such situations can lead one to an extreme: either to adhere more closely to God, or to have doubts about God and His ability to perform. Archbishop Kathey slept on bare, wet ground for nine days and nine nights, under rains and sun surrounded by unknown and dangerous people, but in all these, he held steadfastly to his faith in God. Reptiles and wild animals seemed to avoid him. The world was praying for him. Archbishop Kathey summarises everything as "It's all about God".

The Observer's Guide to Planetary Motion Apr 21 2022 To the naked eye, the most evident defining feature of the planets is their motion across the night sky. It was this motion that allowed ancient civilizations to single them out as different from fixed stars. "The Observer's Guide to Planetary Motion" takes each planet and its moons (if it has them) in turn and describes how the geometry of the Solar System gives rise to its observed motions. Although the motions of the planets may be described as simple elliptical orbits around the Sun, we have to observe them from a particular vantage point: the Earth, which spins daily on its axis and circles around the Sun each year. The motions of the planets as observed relative to this spinning observatory take on more complicated patterns. Periodically, objects become prominent in the night sky for a few weeks or months, while at other times they pass too close to the Sun to be observed. "The Observer's Guide to Planetary Motion" provides accurate tables of the best time for observing each planet, together with other notable events in their orbits, helping amateur astronomers plan when and what to observe. Uniquely each of the chapters includes extensive explanatory text, relating the events listed to the physical geometry of the Solar System. Along the way, many questions are answered: Why does Mars take over two years between apparitions (the times when it is visible from Earth) in the night sky, while Uranus and Neptune take almost exactly a year? Why do planets appear higher in the night sky when they're visible in the winter months? Why do Saturn's rings appear to open and close every 15 years? This book places seemingly disparate astronomical events into an understandable three-dimensional structure, enabling an appreciation that, for example, very good apparitions of Mars come around roughly every 15 years and that those in 2018 and 2035 will be nearly as good as that seen in 2003. Events are listed for the time period 2010-2030 and in the case of rarer events (such as eclipses and apparitions of Mars) even longer time periods are covered. A short closing chapter describes the seasonal appearance of deep sky objects, which follow an annual cycle as a result of Earth's orbital motion around the Sun.

Risky Business in China Dec 17 2021 Risk is a major reason that companies fail in, or fail to enter, China. Packed with case studies, this

unique book demonstrates how correctly applied due diligence can not only reduce business risk in China, but also provide excellent business intelligence to support negotiations and business relationships.

The Politics and Reception of Rabindranath Tagore's Drama

Apr 28 2020 This is the first volume to focus specifically on Rabindranath Tagore's dramatic literature, visiting translations and adaptations of Tagore's drama, and cross-cultural encounters in his works. As Asia's first Nobel Laureate, Tagore's highly original plays occupy a central position in the Indian theatrescape. Tagore experimented with dance, music, dance drama, and plays, exploring concepts of environment, education, gender and women, postcolonial encounters, romantic idealism, and universality. Tagore's drama plays a generous host to experimentations with new performance modes, like the writing and staging of an all-women play on stage for the first time, or the use of cross-cultural styles such as Manipuri dance, Thai craft in stage design, or the Baul singing styles. This book is an exciting re-exploration of Tagore's plays, visiting issues such as his contribution to Indian drama, drama and environment, feminist readings, postcolonial engagements, cross-cultural encounters, drama as performance, translational and adaptation modes, the non-translated or the non-translatable Tagore drama, Tagore drama in the 21st century, and Indian film. The volume serves as a wide-ranging and up-to-date resource on the criticism of Tagore drama, and will appeal to a range of Theatre and Performance scholars as well as those interested in Indian theatre, literature, and film.

Cloud Technology: Concepts, Methodologies, Tools, and

Applications Dec 05 2020 As the Web grows and expands into ever more remote parts of the world, the availability of resources over the Internet increases exponentially. Making use of this widely prevalent tool, organizations and individuals can share and store knowledge like never before. Cloud Technology: Concepts, Methodologies, Tools, and Applications investigates the latest research in the ubiquitous Web, exploring the use of applications and software that make use of the Internet's anytime, anywhere availability. By bringing together research and ideas from across the globe, this publication will be of use to computer engineers, software developers, and end users in business, education, medicine, and more.

Playfair Cricket Annual 2015 Nov 04 2020 The cricket world's bestselling pocket annual. The indispensable guide to the season. The Playfair Cricket Annual 2015 includes coverage of the 2014 season, including the LV= County Championship, Royal London One-Day Cup and the NatWest T20 Blast. It also contains: a detailed register of all

current first-class county players and umpires, including career bests in international Twenty20 matches; county records and 2014 first-class averages; current county players' first-class and List A limited-overs career records; Test match scores and averages; women's limited-overs and international Twenty20 records; 2015 fixtures, including 2nd XI and Minor Counties. New features this year include county players' squad numbers listed, as well as any IPL and Big Bash appearances, plus a new players' register for England's women internationals.

The Language of Crisis Feb 25 2020 In times of crisis, how do people conceptualise and communicate their experiences through different forms and channels? How can original research in cognitive linguistics, discourse analysis and crisis studies advance our understanding of the ways in which we interact with and communicate about crisis events? In answering these questions, this volume examines the unique functions, features and applications of the metaphors and frames that emerge from and give shape to crisis-related discourses. The chapters in this volume present original concepts, approaches, authentic data and findings of crisis discourses in a wide range of organisational, political and personal contexts that affect a diverse body of language users and communities. This book will appeal to a broad readership in linguistics, sociological studies, cognitive sciences, crisis studies as well as language and communication researchers and practitioners.

Studies in Philology Jun 30 2020 Linguistics, Literature and Cultural Studies are the three main research areas within Philology. Scientific production, such as conferences and journals, has tended towards specialization, and has been traditionally classified according to separate disciplines and languages. However, this volume offers a holistic view of the wide area of Philology, therefore allowing the permeability of the three areas mentioned above. As such, this book shows that the line that separates Linguistics, Literature and Cultural Studies is actually very thin. This volume is composed of a miscellanea of philological studies dealing with various trends in Modern Language research. It looks at three languages in particular: Spanish, English and French, with a special relevance to the first two.

The Politicization of Ethnicity as Source of Conflict Nov 16 2021 In view of the explosion of violent conflicts in many parts of the world and the hasty, but prevailing, assumption that ethnicity is the source of these conflicts, this book is encompassed to highlight, describe and examine how ethnicity is politicized in many of these current conflicts. By deploying the instrumentalist approach and the theory of identity and difference in ethnicity, the author identifies the actors involved and depicts how religion is exploited as an instrument of division by reflecting it on the Nigerian situation, exploring the examples of the Jos conflicts and the Warri Crisis within a twenty years period, 1990 to 2010.

Versatile Routing and Services with BGP Jan 26 2020 Design a robust BGP control plane within a secure, scalable network for smoother services A robust Border Gateway Protocol setup is vital to ensuring reliable connectivity, an essential capability for any organization. The Internet has become a necessary, always-on service

in homes and businesses, and BGP is the protocol that keeps communication flowing. But BGP also has become crucial to delivery of intra-domain business services. But the network is only as reliable as BGP, so service enablement depends upon making BGP more stable, reliable, and service-rich. Alcatel-Lucent Service Router Operating System is engineered to bear the load of the most demanding networks. The system features support for Symmetric Multiprocessing and unprecedented depth of advanced routing features, all within a single OS that's supported across the entire Alcatel-Lucent IP/MPLS router portfolio. Versatile Routing and Services with BGP provides guidance toward implementation of BGP within SR-OS, and details the use and control of each feature. The book provides in-depth coverage of topics such as: BGP/MPLS IP-VPN, VPLS, VPWS Labeled Unicast IPv4, reconvergence, and multicast Security, graceful restart and error handling IPv6 PE (6PE) and IPv6 extensions to BGP/MPLS IP-VPN A look at forthcoming features such as Ethernet VPN Basic BGP competency is assumed, but the book is accessible even to those with zero familiarity with Alcatel-Lucent's SR-OS. It underscores the idea that BGP is more than just service enablement, and can also be used for infrastructure layer transport - but both layers must be solid, scalable, and able to quickly reconverge. Versatile Routing and Services with BGP demonstrates the creation of a robust BGP control plane within a, secure network, allowing the delivery of flawless, uninterrupted service.

Many Rivers, One Sea Sep 21 2019 A perennial frontier for Islamic orthodoxy, Bangladesh is witnessing an alarming rise in Islamist-inspired assassinations and terrorist attacks. In July 2016, the world's attention fell upon a café in a leafy Dhaka neighborhood as the barbarity of a distant 'Caliphate' was visited on this corner of South Asia. Twenty-nine died in the assault on the Holey Bakery, affixing an unbidden nightmare to the image of a supposedly tolerant Muslim nation. Joseph Allchin probes Bangladesh's recent and distant past as he investigates how it has become the latest front in world extremism. Delving into the local and global differences between political actors, he exposes the determining influence still exercised on most allegiances by the long aftermath of the country's independence struggle, and scrutinizes the careers of two long-term rivals: current prime minister Sheikh Hasina, and Khaleda Zia, who held the office in 1991-6 and 2001-6. This unerring investigation examines the relationship between radical Islam and the Bangladeshi political class, exposing the forces driving the conditions for extremism that bedevil the country's present and future.

Cloud Computing Applications for Quality Health Care Delivery Jan 06 2021 Software applications once held on local computers and servers are beginning to shift to the public Internet sphere, and private health information is no exception. The likelihood of placing once restricted and private health records "in the cloud" is increasing. Cloud Computing Applications for Quality Health Care Delivery focuses on cloud technologies that could affect quality in the healthcare field. Leading experts in this area offer their knowledge and contribute to the demystification of healthcare in the Cloud. This

publication will prove to be a useful tool for undergraduate and graduate students of healthcare quality and management, healthcare managers, and industry professionals.

CORPORATE FINANCE May 22 2022 In the wake of fast changing economic landscape—characterized by global financial crisis, volatile equity and bond markets, rising dominance of emerging markets and increasing investor activism—the role of financial managers in an organization has assumed significant importance. This text aims at educating the students the fundamentals of Corporate Finance, and explains how various theories can be applied for efficient decision making for the financial managers. The book is conceptualized on practical approach, and explores various topics in an easy and step-by-step approach, backed by numerous examples, self-test exercises and India-centric cases. The complex financial concepts related to capital structure, risk and return analysis, valuation of financial securities, market efficiency and portfolio management have been explained in a reader-friendly manner to provide a unique learning experience. The book is intended for the postgraduate students of Management, and practising financial managers. Key features

- The chapters are backed by strong practical experience of in-depth financial analysis of Companies.
- Supplemented with real-life examples and scenarios in a concise and comprehensive presentation.
- India-centric cases to create an interactive class room environment.
- Topics for further research have been included on each major topic as 'Researchable Issues'.
- Each chapter contains side-boxes to highlight the important points for quick revision.
- Each chapter is incorporated with Review Questions, Practice Exercises and Self-Test Questions to add analytical approach to the subject.
- Revision set and PPT slides provided as web support.
- Solutions Manual for instructors, available on request.

Law and Practice of International Arbitration in the CIS Region Mar 20 2022 The former Soviet republics of the Commonwealth of Independent States (CIS) generate a significant and growing amount of work for the major Western and CIS regional international arbitral institutions. This book, a country-by-country analysis of regulation and practice of international arbitration in ten CIS jurisdictions, offers the first comprehensive review of commercial arbitration in the region. It also analyses notable developments in the use of arbitration mechanisms contained in bilateral and multilateral investment treaties affecting the region. The book provides not only a detailed analysis of the law, but also insight from local practitioners into the culture of arbitration and how the law is applied in each jurisdiction.

Jurisdictions covered include Armenia, Azerbaijan, Belarus, Kazakhstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine and Uzbekistan. In addition to detailed discussion of the particular features of arbitral practice in each jurisdiction, contributions cover the following issues and topics:

- arbitrability of disputes and public policy;
- arbitral procedure;
- recognition and enforcement of commercial and investor-state arbitration awards;
- implementation of the UNCITRAL Model Law and other instruments affecting arbitral practice and procedure;
- statistics from key arbitration institutions;
- adherence to the ICSID, New York and key regional conventions

relevant to arbitration;

- relevant regulations, cases as well as applicable bilateral investment treaties;
- law and practice related to investor-state arbitration;
- and
- role of the Court of the Eurasian Economic Union. An informative introductory chapter provides detailed discussion and analysis of historic and current trends affecting arbitration practice among the CIS countries, including the role of regional conventions relatively unknown in the West. As a comprehensive overview of international arbitration in this burgeoning region, this book has no peers. It is sure to be highly valued and used by lawyers, arbitrators, and academics concerned with alternative dispute resolution, as well as by arbitration institutions, companies, states, and individuals engaged in arbitration.

Upgrading Informal Settlements in South Africa Jun 18 2019 More than 1.2 million households in South Africa live in informal settlements, without access to adequate shelter, services or secure tenure. There has been a gradual shift to upgrading these informal settlements in recent years, and there have been some innovative experiments. Upgrading Informal Settlements in South Africa: a partnership-based approach examines the successes and challenges of informal settlement upgrading initiatives in South Africa and contextualises these experiences within global debates about informal settlement upgrading and urban transformation. The book discusses:

- The South African informal settlement upgrading agenda from local, national and international perspectives
- South African 'city experiences' with informal housing and upgrading
- The role of partnerships, actors and capabilities in pursuing an incremental upgrading agenda
- Tools, instruments and methodologies for incremental upgrading
- Implications of the upgrading agenda for the transformation of cities

The book has been written and edited by a wide range of practitioners and researchers from government, NGOs, the private sector and academia. It covers theory and practice and represents a vast accumulated body of housing experience in South Africa.

Housing Finance Strategies of Informal Settlement Dwellers Jul 12 2021 Access to housing and to housing finance remains a challenge in African cities. This study examines the housing finance strategies of informal settlement dwellers in Dar es Salaam (Tanzania) and identifies a range of factors that enable or constrain actors to make investments in housing. Based on ethnographic, qualitative and quantitative research, this study provides detailed insights into individual housing biographies, and explains why some actors invest in housing, while others do not. It finally challenges widely accepted development concepts like the provision of housing microfinance, land regularisation, infrastructure upgrading and eviction and argues for a deeper understanding of everyday lives in order to improve housing conditions. Christiane Rudic studied Geography with particular focus on urban development and housing at Bayreuth University.

United States and Pakistan in the 21st Century Aug 13 2021 This book

historically maps and examines the evolving, contemporary geostrategic and geopolitical imperatives of the United States within Pakistan and the South Asian region, especially after September 11, 2001. It offers a detailed and theoretical account of the rapidly changing context of US foreign policy towards Pakistan after 2001. The history of the US-Pakistan relationship has been a complex and inscrutable mix of cooperation and conflict has turned even more challenging after 9/11. This book covers the latest developments and relevant themes from world politics as it discusses the impact of the unprecedented rise in religious extremism in Pakistan, stemming from the US War on Terror as well as Pakistan's economic vulnerability and military dictatorship, India's offer to support the US in its war in Afghanistan, Pakistan's nuclear capability, and the US administration's decision to end financial aid to Pakistan. The study highlights the fact that, from the receding of British influence in the region through the Cold War and post-Cold War phases to the post-9/11 period, US-South Asia policy has been informed by the theoretical paradigm of the grand strategy of primacy. This topical book will be useful to scholars and researchers of international relations, politics, political studies, strategic and defence studies, security and peace studies, foreign policy, area studies, and South Asian studies. It will also interest diplomats, politicians, policymakers, security experts, journalists, and think tanks interested in India, Pakistan, and the United States on issues of international politics, world affairs, and terrorism.

Regenerative Strategies for the Treatment of Knee Joint

Disabilities Aug 21 2019 This book presents regenerative strategies for the treatment of knee joint disabilities. The book is composed of four main sections totaling 19 chapters which review the current knowledge on the clinical management and preclinical regenerative strategies. It examines the role of different natural-based biomaterials as scaffolds and implants for addressing different tissue lesions in the knee joint. Section one provides an updated and comprehensive discussion on articular cartilage tissue regeneration. Section two focuses on the important contributions for bone and osteochondral tissue engineering. Section three overview the recent advances on meniscus repair/regeneration strategies. Finally, section four further discusses the current strategies for treatment of ligament lesions. Each chapter is prepared by world know expert on their fields, so we do firmly believe that the proposed book will be a reference in the area of biomaterials for regenerative medicine.

The Routledge Handbook of Responsible Investment Feb 07 2021

The UN-supported Principles for Responsible Investment initiative has led to around a third of the world's financial assets being managed with a commitment to invest in a way that considers environmental, social or governance (ESG) criteria. The responsible investment trend has increased dramatically since the global financial crisis, yet understanding of this field remains at an early stage. This handbook provides an atlas of current practice in the field of responsible investment. With a large global team of expert contributors, the book explores the impact of responsible investment on key financial actors

ranging from mainstream asset managers to religious organizations. Offering students and researchers a comprehensive introduction to current scholarship and international structures in the expanding discipline of responsible investment, this handbook is vital reading across the fields of finance, economics and accounting.

Death in State Custody Jul 24 2022 What is expected of State authorities with regard to the obligation to safeguard the life of detainees? What obligations do State authorities have in relation to the investigation into deaths that occur during deprivation of liberty by the State? This book addresses these questions regarding death in State custody in view of the European Convention on Human Rights, in particular the right to life, the prohibition of torture and the right to respect for private life (including the right to self-determination). It also provides an analysis of whether the Dutch legal framework contains safeguards to meet the requirements that follow from the European Convention on Human Rights. Matters that are discussed in detail are the obligation to provide healthcare to detainees and to take protective measures to safeguard the life of detainees. The ethical issues regarding end of life decisions of detainees, like refusal of medical treatment, hunger and/or thirst strike, suicide and euthanasia, and the conflicts that may arise in this regard considering the obligations of State authorities are addressed. This book is a must-have for all those who are involved in the (medical) treatment of detainees and who are confronted with death in State custody.

PLATE: Product Lifetimes And The Environment Dec 25 2019

Product lifetimes are critical for the circular economy, resource efficiency, waste reduction and low carbon strategies for sustainability, and are therefore of interest to academics from many different disciplines as well as original equipment manufacturers (OEMs) and other stakeholders. The challenges related to product lifetimes must be tackled from multiple perspectives, making the sharing of knowledge and expertise from different disciplines particularly important. This book presents papers from the second Product Lifetime and the Environment (PLATE) conference, held in Delft, the Netherlands, in November 2017. The conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other's knowledge and further advance the field. The book includes the 88 full papers delivered at the conference, grouped according to the following 7 conference themes: design for product longevity; product lifetime optimization; cultural perspectives on the throwaway society; circular economy and product lifetimes; business opportunities, economic implications and marketing strategies; consumer influences on product lifetimes; and policy, regulation and legislation. The book will be of interest to all those concerned with sustainable consumption, circular economy and resource efficiency.

Computing Bodies Jul 20 2019 Claude Draude analyzes embodied software agents - interface solutions that are designed to talk back and give emotional feedback - from a gender and media studies perspective. She addresses technological and sociocultural concepts in their interplay of shifting the boundary between what is considered as human and what as machine. The author discusses the technological realization of specific personality models that define the design of embodied software agents - emotion and gaze models, in particular.

Finally, she explores these models in their broader cultural context by relating them to the prominent topic of the Turing test and the notion of the Uncanny Valley.

Our Romantic Journey Through the Days Oct 23 2019 This is a 'conversational' novel that gives a vivid description of the

awesomeness of a couple's seemingly unending romantic relationship. The love spanned from pledges of commitment through words and acts which made it seem as though it was meant to be until death.
