Privatizing China Feb 08 2021 Much is written about the various efforts aimed at reforming China's state-owned enterprises. But in all this literature

the Chinese government's determined effort to use the equity capital markets as a tool of enterprise reform has been virtually ignored. The fact is that during the past decade this has been, and will continue to be, the principal thrust with regard to the reform of state-owned enterprises. On-again, off-again, noises about bankruptcy, M&A solutions and asset management companies are only sideshows in the process. Carl E. Walter is a Managing Director of JP Morgan and Chief Operating Officer of its China businesses. Prior to joining JP Morgan in 2001, Mr. Walter was a Managing Director and member of the Management Committee of China International Capital Corporation. He was Chief Representative in Beijing for Credit Suisse First Boston from 1993-8. During his decade in China, Mr. Walter has participated in a number of pathbreaking international and domestic share listings and debt issues for Chinese companies, banks and the Ministry of Finance. He holds a PhD from Stanford University and a graduate certificate from Beijing University. Fraser Howie is an independent financial analyst located in Beijing. Over the past ten years he has worked in Hong Kong trading equity derivatives at Bankers Trust and Morgan Stanley. After moving to China in 1998 he worked in the Sales and Trading Department of China International Capital Corporation then with a domestic retail financial services company and most recently with China M&A Management Company.

The Financial Markets of Hong Kong Aug 29 2022 The financial markets of Hong Kong have a reputation for volatility, but careful analysis of past behaviour reveals consistent trends and coherent actions. This study, first published in 1991, at a time of uncertainty before Hong Kong's transfer to China in 1997, analyses each of the financial markets in the colony, and explains the activities of banks, deposit-taking companies, the stock exchange, and markets in capital, gold, futures, unit trusts, and foreign exchange. Examining these in terms of structure, regulation and in competition, it constitutes not just a description but a thorough analysis of the characteristic dynamics of each market.

Chinese Dual-Class Shares Listed in Hong Kong and Mainland China Jun 26 2022 Inhaltsangabe: Abstract: This paper aims at explaining the phenomenon of price anomalies between dual-class shares of companies located in mainland China (hereafter China). A-shares listed on either the Shanghai Stock Exchange (SHSE) or Shenzhen Stock Exchange (SZSE) command a premium over the price of the corresponding firm's H-shares traded at the Stock Exchange of Hong Kong (HKSE). This pricing puzzle arises from the segmentation of Chinese equity markets H-shares may be exclusively acquired by Hong Kong residents and international investors whereas A-shares are restricted to mainland Chinese investors. Although both classes of stock are entitled to the same future cash flows, investors are only willing to buy H-shares at a price significantly lower than that of A-shares. This unique setup offers the opportunity to test competing theories about the effects of market segmentation on asset pricing and to examine the factors that induce the price gap between cross-listed shares on different stock exchanges. Knowledge of the variables determining the price spread between H- and A-shares can make valuable contributions in a number of ways. Firstly, companies in mainland China pursuing initial public offerings (IPO) or seasoned equity offerings (SEO) may base their financing decision on a more thorough understanding of the parameters affecting stock prices of cross-listings in the respective markets. Secondly, policymakers in emerging country stock markets may draw conclusions concerning the design of foreign ownership regulation and investment restraints imposed on domestic and foreign investors. Lastly, international and local investors may build on a more profound understanding of the H- versus A-share discount (hereafter H-share discount) to narrow down attractive investment opportunity sets, especially in the light of the latest regulatory changes on the Chinese equity market. As of August 2007 the government body monitoring and regulating the national currency, China's State Administration of Foreign Exchange (SAFE), loosened its rigorous foreign exchange policy. Prior to the recent SAFE ruling, the annual amount to be freely converted from Chinese Yuan Renminbi (RMB) into foreign currencies was capped at a 50,000

United States Dollar (USD) limit. Under the new regime, mainland retail investors are granted unlimited convertibility of RMB into Hong Kong Dollar (HKD) given that investments flow into the Hong Kong securities market. In the [...]

Chinese Companies and the Hong Kong Stock Market Oct 31 2022 Listing by companies from one country on the stock market of another country is a device often used both to raise capital in, and to increase bonding with, the target country. This book examines the listing by Chinese companies on the Hong Kong stock market. It discusses the extent of the phenomenon, compares the two different regulatory regimes, and explores the motivations for the cross-listing. It argues that a key factor, in addition to raising capital and bonding with the Hong Kong market, is Chinese companies' desire to encourage legal and regulatory reforms along Hong Kong lines in mainland China, in order to develop and open up China's domestic capital markets.

Intervention to Save Hong Kong Dec 09 2020 By August 1998, the Hong Kong economy had become threatened not only by the natural consequences of the Asian crisis (1997-98), but also by waves of speculation, betting that the authorities would be forced to abandon the linked exchange rate (to the US dollar). When facing previous speculative attacks (starting October 1997), the authorities had followed traditional policies of raising interest rates. But by August 1998, such policies had helped to batter asset markets; property prices and output were falling, and confidence was low. Moreover, the speculators had developed an ingenious 'double play', simultaneously selling both the foreign exchange market and the Hang Seng equity market short; whether the authorities used an interest rate defense, or abandoned the 'link', the speculators would gain either way. So, the authorities decided on a bold, unexpected and unconventional response to reports of a further attack. They would undertake counter-intervention, again both in the equity and foreign exchange markets. This book provides a fascinating story in itself, and insights into what lessons academics and practitioners can learn from the turbulent events of the time.

A Guide to the Equity Markets of Hong Kong May 26 2022 This book explains the structure and outline of Hong Kong's equity markets, and examines Hong Kong's rising prominence (ranked sixth largest in the world) and importance as a financial centre in the region. It details the workings of the equity market system, covering the basics of all the major derivatives, and gives a brief overview of its other regional contemporary markets. Hong Kong's equity market has changed beyond all recognition over the last decade. The rise of China and East Asia has fuelled tremendous growth in this market. In the last two years alone, the market capitalisation of stocks traded in The Stock exchange of Hong Kong (SEHK) has grown by almost 100%. This growth, reflecting both the appreciation of existing stock values and a flood of new listing, is expected to continue as the PRC develops in to a world economic power. The rising volumes of trading and recent flurry of 'H' share listings and other PRC-backed stocks, is also indicative of the PRC's commitment to establish Hong Kong as the centre of its financial system. Hong Kong's mantle as the financial

Das Shanghai Hong Kong Stock Connect. Kontrolle, Wachstum und Transformation in China May 02 2020 Bachelorarbeit aus dem Jahr 2016 im Fachbereich VWL - Internationale Wirtschaftsbeziehungen, Note: 1,6, Hochschule Ruhr West (Wirtschaftsinstitut), Sprache: Deutsch, Abstract: Das Shanghai Hongkong Stock Connect (SH-HK-SC) ist ein aktuelles Pilotprojekt von 2014, in seiner Art einzigartig und steht im Zusammenhang mit dem Entwicklungspfad Chinas. Dies gilt sowohl für die Kapitalmarktentwicklung als auch für den Transformationsprozess des Landes. Dieses Pilotprojekt soll in der vorliegenden Bachelorarbeit untersucht werden. Die Öffnungs- und Reformpolitik hat schrittweise auch den Kapitalmarkt erfasst. Dass sich überhaupt ein Kapitalmarkt im sozialistischen Land entwickeln konnte, könnte einem Wunder gleichkommen. Finanzmärkte besitzen heute einen enormen Einfluss für Wachstum und Entwicklung in Volkswirtschaften. In diesem Werk geht es um die Bedeutung des Pilotprojektes für die Volksrepublik China. Shanghai im "Mainland" China gilt seit Jahrzehnten als bedeutsamer Finanzplatz und die Rolle von Hongkong im Internationalen Kapitalmarkt ist noch bedeutsamer. Mit diesem Projekt rücken die beiden nun noch stärker zusammen und ermöglichen erstmals freieren Kapitaltransfer nach und von China über Hongkong in die Welt. Die Initiative markiert einen Wendepunkt für den internationalen Zugang zu den noch begrenzten chinesischen Kapitalmärkten. Es ist ein signifikanter Fortschritt von einem System der indirekten Investments über QFII. Dadurch und durch weitere Initiativen werden die chinesischen Börsen zusammen zum zweitgrößten Kapitalmarkt weltweit. Ein Meilenstein für die Entwicklung des chinesischen Kapitalmarktes? Ganz klar: ja!

Managing Equity Financing And Enhancement Of Corporate Growth Nov 27 2019 Starting from early 1980's, Hong Kong proclaimed her intended development towards an international financial center. The study has disclosed noteworthy corporate practices by scrutinizing how the equity financing decisions of representative, large Hong Kong companies contributed to their individual corporate growth during Hong Kong's target of development of the decade of 1980s. Impressive corporate growth of selected companies, amidst a simple taxation system commanding low taxes, did exemplify accelerated growth by equity financing amidst market capitalization of a financial center. Remarkably, the equity financing strategies being applied led to corporate growth in support of MM's proposition of irrelevance of capital structure to firm market value. Typically, the aggregated corporate growth in equity from 1984 to 1993, for Hang Seng Index Constituent Stock Companies, has indicated a positive linear relationship to the aggregate of equities issued during the period. The documented evidence suggests that various forms of equity issues can facilitate corporate growth, presenting valuable experience for companies considering use of equity financing and/or debt financing.

Corporate Governance and China's H-share Market Jun 02 2020 Using detailed case studies of the first nine mainland Chinese companies to be listed on the Hong Kong stock exchange, this book examines the evolution of corporate governance law and culture in China's H-share market. A story emerges not of tensions between ideas of corporate governance from two different legal systems - Hong Kong vs mainland Chinese - nor about legal convergence as China adopts concepts from Anglo-American jurisdictions. Rather, it is a story of individual firms being pragmatic in mediating the different agendas of state-agencies that own or control them.

Demystifying China's Stock Market Jul 04 2020 Mainstream research has rationalized China's stock market on the basis of paradigms such as the institutional approach, the efficient market hypothesis, and corporate valuation principles. The deviations from such paradigms have been analyzed as puzzles of China's stock market. Girardin and Liu explore to what extent, in the perspective of Chinese cultural and historical characteristics, far from being puzzles, these 'deviations' are rather the symptoms of a consistent strategy for the design, development and regulation of a government-dominated financial system. This book will help investors, observers and researchers understand the hidden logic of the design and functioning of China's modern stock market, taking a political economy view.
