**human leg wikipedia** Oct 17  
2021 structure in human  
anatomy the lower leg is the

part of the lower limb that lies  
between the knee and the  
ankle anatomists restrict the  
term leg to this use rather than  
to the entire lower limb the  
thigh is between the hip and  
knee and makes up the rest of  
the lower limb the term lower  
limb or lower extremity is  
commonly used to describe all  
of the leg

*lower limb arteries and nerves  
anatomy branches kenhub* Aug  
15 2021 oct 11 2022 arteries  
and nerves of the knee and leg  
anterior and posterior views  
the popliteal artery is a direct  
continuation of the femoral  
artery carrying blood further  
down the lower limb in the  
knee it gives off the superior  
and inferior genicular arteries

which wrap around this region and supply it with blood read about the arterial anastomoses of the lower extremity here *ulna wikipedia* Aug 03 2020 the ulna pl ulnae or ulnas is a long bone found in the forearm that stretches from the elbow to the smallest finger and when in anatomical position is found on the medial side of the forearm that is the ulna is on the same side of the forearm as the little finger it runs parallel to the radius the other long bone in the forearm the ulna is usually slightly longer than the radius but [arterial duplex ultrasound legs cedars sinai](#) Apr 18 2019 upper extremity vein mapping varicose vein surgery pre op
