The Oxford Handbook of Skills and Training Oct 26 2019 Skills and workforce development are at the heart of much research on work, employment, and management. But are they so important? To what extent can they make a difference for individuals, organizations, and nations? How are the supply and, more importantly, the utilization of skill, currently evolving? What are the key factors shaping skills trajectories of the future? This Handbook provides an authoritative consideration of issues such as these. It does so by drawing on experts in a wide range of disciplines including sociology, economics, labour/industrial relations, human resource management, education, and geography. The Handbook is relevant for all with an interest in the changing nature - and future - of work, employment, and management. It draws on the latest scholarly insights to shed new light on all the major issues concerning skills and training today. While written primarily by leading scholars in the field, it is equally relevant to policy makers and practitioners responsible for shaping the development of human capability today and into the future.

[International Cooperation, Convergence and Harmonization of Pharmaceutical Regulations](#) Mar 31 2020 International Cooperation, Convergence and Harmonization of Pharmaceutical Regulations: A Global Perspective provides the current status of the complex and broad phenomenon of cooperation, convergence and harmonization in the pharmaceutical sector (Part I), thoroughly evaluates its added value and its critical parameters and influencing factors (Part II) in order to recommend actions and measures to support the next steps for cooperation, convergence and harmonization (Part III). All of these recommendations in the book support the establishment of a better coordinated global pharmaceutical system which represents the best realistic alternative to fulfill the objective to establish a global coalition of regulators and to respond to an increased demand to further cooperation in the pharmaceutical sector. This proposed framework, which leverages all of the ongoing positive cooperation initiatives and uses as foundations all of the numerous harmonization projects developed over the years, presents advantages for all stakeholders and would definitively have significant added value to the promotion and protection of global public health. The status of all major worldwide harmonization and cooperation initiatives (at bilateral, regional, and global levels) The value of cooperation in the pharmaceutical sector and the driving factors behind harmonization The proposition of a structure for the global pharmaceutical system and timely recommendations for enhancing international cooperation, as well as further discussion and policy changes in this area

[The Four Pillars of Portfolio Management](#) May 14 2021 Portfolio management consists mainly of making decisions about which initiatives to undertake, which initiatives not to pursue, and which resources are to be allocated to which portfolio component. At least, that's how it is most commonly presented in textbooks and courses. Indeed, it is all of that, but it is also so much more. Portfolio management is, of course, about making these decisions, but, more accurately, it is about making them with the goal of creating value for an organization's wide population of stakeholders, both internal and external. This value is not only expressed in financial terms but also in social terms. The portfolio should create value for all stakeholders, who thereby support the portfolio organization and enable it to sustain itself. Portfolio management is about the realization of strategic vision, achieving a purpose, and developing an intelligent way of using resources to benefit stakeholders. This requires the ability to find a balance among the different dimensions of portfolio governance and among the constraints constantly shaping and reshaping the business environment. This is what portfolio management is truly about; this is what organizational management is about. [The Four Pillars of Portfolio Management: Organizational Agility, Strategy, Risk, and Resources](#) takes readers on a journey navigating the dimensions and constraints to be balanced and integrated as part of the portfolio and organizational decision-making process. By balancing the requirements of strategic alignment with the exposure to risk and by reconciling resource demands with capability, a portfolio manager can develop and sustain an organization despite the constant and dynamic evolution of the business environment. This book explains how to manage portfolios that create the agility all organizations require to survive and thrive.

Construction Law Nov 07 2020 Now in its second edition, Construction Law is the standard work of reference for busy construction law practitioners, and it will support lawyers in their contentious and non-contentious practices worldwide. Published in three volumes, it is the most comprehensive text on this subject, and provides a unique and invaluable comparative, multi-jurisdictional approach. This book has been described by Lord Justice Jackson as a "tour de force", and by His Honour Humphrey LLOYD QC as "seminal" and "definitive". This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law, as well as changes to statutes and regulations. The laws of Hong Kong and Singapore are also now covered in detail, in addition to those of England and Australia. Practitioners, as well as interested academics and post-graduate students, will all find this book to be an invaluable guide to the many facets of construction law.

Measuring International Authority Aug 24 2019 This is the third of five ambitious volumes theorizing the structure of governance above and below the central state. This book is written for those interested in the character, causes, and consequences of governance within the state. This book sets out a measure of authority for seventy-six international organizations (IOs) from 1950, or the time of their establishment, to 2010 which can allow researchers to test expectations about the character, sources, and consequences of international governance. The international organizations considered are regional (e.g. the EU, Andean Community, NAFTA), cross-regional (e.g. Commonwealth of Nations, the Organization of Islamic Cooperation), and global (e.g. the UN, World Bank, WTO). Firstly, the book introduces carefully constructed estimates for the scope and depth of authority exercised by international governments. The estimates are unique in their comparative scope, their specificity, and time span. Secondly, it describes broad trends in IO authority by comparing delegation and pooling, over time, across IOs, and across decision areas. Thirdly, it presents the evidence gathered by the authors to estimate international authority by carefully discussing forty-seven international organizations, and showing how their bodies are composed, what decisions each body makes, and how they make decisions. Transformations in Governance is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions, down to subnational governments, and side-ways to public-private networks. It brings together work that significantly advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series targets mainly single-authored or co-authored work, but it is pluralistic in terms of disciplinary specialization, research design, method, and geographical scope. Case studies as well as comparative studies, historical as well as contemporary studies, and studies with a national, regional, or international focus are all central to its aims. Authors use qualitative, quantitative, formal modeling, or mixed methods. A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and Walter Mattli of the University of Oxford.

The Future of Quality News Journalism Jun 14 2021 In the face of the continuously changing challenges of the digital age, it is difficult for quality news journalism to survive on any significant scale if a means for adequately funding it is not available. This new study, a follow-up to 2007's The Future of Journalism in the Advanced Democracies, includes a comparative analysis of possible alternative business models that may save the future of the quality news business across the developed, intermediate, and developing worlds. Its detailed evaluation encompasses also the different ways in which wider key issues are affecting the prospects for quality news as a core ingredient of effectively working democracies. It focuses on the United States, the United Kingdom, South Africa, India, Kenya, and selected parts of the Arab World, providing a comprehensive cross-cultural survey of different approaches to addressing these various issues. To keep the study firmly rooted in the "real world" the contributors include distinguished practitioners as well as experienced academics.

The Social Psychology of Aggression Feb 08 2021 The second edition of this textbook provides a thoroughly revised, updated and expanded overview of social psychological research on aggression. The first part of the book covers the definition and measurement of aggression, presents major theories and examines the development of aggression. It also covers the role of situational factors in eliciting aggression, and the impact of using violent media. The second part of the book focuses on specific forms and manifestations of aggression. It includes chapters on aggression in everyday life, sexual aggression and domestic violence against children, intimate partners and elders. There are two new chapters in this part addressing intergroup aggression and terrorism. The concluding chapter explores strategies for reducing and preventing aggression. The book will be essential reading for students and researchers in psychology and related disciplines. It will also be of interest to practitioners working with aggressive individuals and groups, and to policy makers dealing with aggression as a social problem.

Better Practices of Project Management Based on IPMA competences – 4th revised edition Dec 09 2020 This is the revised edition of the first text book in English specially developed for training for IPMA-D and IPMA-C exams, now based on Version 4 of the ICB. In this 4th edition, the text has been restructured and extended to align with the structure and scope of the competence elements in the ICB version 4, divided into Practice competences, People competences and Perspective competences. Therefore, this book will be essential guidance and study book for everyone studying for the IPMA-D, IPMA-C and IPMA-B exams. Besides that, it is an extremely rich source book for those project managers that have committed themselves to a lifelong professional development. In addition, the book had to be applicable to groups of project managers originating from diverse cultures. For this reason, this is not a book that tells how a Westerner must behave in an Arab or an Asian country, but one that looks at the different subjects covered in the ICB, as seen from diverse cultural standpoints. Each chapter is based on the same structure: Key concepts, Introduction, Actions that lead to competence development, Self-assessment, Special topics, Assignments. Text boxes, additional to the main text, give additional explanation to the main text. An elaborate Index of terms allows that this book can be used as a highly up-to-date information source to all aspects of project management. Next to that all, a web-site is available with videos, discussion fora on specific topics, and the opportunity to discuss with the author.

EU Immigration and Asylum Law (Text and Commentary): Second Revised Edition Oct 19 2021 Since 1999, the EU has adopted legislation harmonizing many areas of immigration law, in particular rules on borders, visas, legal migration, and irregular migration. The much-enlarged and fully updated second edition of this book contains the text of and detailed commentary upon every significant measure in this field proposed or adopted up until 1 September 2011. It includes commentary on the EU visa code, the Schengen Borders Code, the Frontex Regulation, the Returns Directive, the Directives on family reunion, long-term residents and single permits for migrant workers, and many more besides. This is the essential guide for any lawyers, academics, civil servants, NGOs and students interested in this area of law.

Die Fakultät für Mathematik und Geoinformation/The Faculty of Mathematics and Geoinformation Jul 04 2020 The Faculty of Mathematics and Geoinformation of the TU Wien has existed as such since the division of the early, very large Faculty of Technical Sciences in 2004. It provides its own study programmes in both subjects, as well as ensuring the mathematical and geometrical basic education of the students of all seven other faculties. The faculty also conducts research in broad and highly crucial focal areas. The current volume is part of a comprehensive commemorative series published in 2015 for the bicentennial memorial of the TU Wien providing information on the research

activities, teaching tasks, and history of the Faculty of Mathematics and Geoinformation, in particular over the last 50 years. Special attention has been paid to the exceptional scientific achievements of faculty members.

**Insights, Innovation, and Analytics for Optimal Customer Engagement Aug 17 2021** Engaging customers has become an effective strategy of marketers for improving customer-brand relationships as customer engagement is a perfect predictor of organic growth. Aggressive sales promotions, advertising campaigns, rewards, discounts, and more may attract a customer, but customer engagement creates an emotional connection with the brands/firms/services, which drives customer loyalty and long-term profitability. This has become much more applicable and effective with the use of social media platforms and the increased access of internet. Moreover, the implementation of customer analytics to measure engagement activities has provided marketers with more insights for improving services. **Insights, Innovation, and Analytics for Optimal Customer Engagement** is an advanced reference book that covers the latest emerging research in customer engagement and includes underlying theories, innovative methods, a review of existing literature, engagement analytics, and insights for marketers with reference to customer engagement. The book covers various product categories, industries, and sectors that are working to engage customers in inventive and creative ways. This book is a comprehensive reference tool for marketers, brand managers, social media specialists, advertisers, managers, executives, academicians, researchers, practitioners, and students interested in gaining comprehensive knowledge about customer engagement and the latest advancements in the field.

**The IT Service Part 2 – The Handbook May 26 2022** Since the early 2000s numerous external scenarios and drivers have added significant pressures upon the IT organisations. Among many, these include: Regulatory compliance: data privacy requirements and corporate scandals have focused a requirement for transparency – with high impact on IT organisations Economic pressures: require IT organisations to more closely align with business imperatives. The outcome has been an explosion of 'standards' and 'frameworks' each designed to support the IT organisation as it demonstrates to the world that they are the 'rock' of an organisation: strong, reliable, effective and efficient. Most of these standards and frameworks have great elements but no organisation can adopt them all – and many were created without sufficient considerations for interoperability. **The IT Service (in 2 parts)** looks at the key and very simple goals of an IT organisation and clearly and succinctly presents to the reader the best 'rock solid' elements in the Industry. It then shows how all the key elements can easily 'crystallise' together – with great templates and check-lists. In Part 1 (another book) the reader is presented with the simple objectives that the IT department really must address. In Part 2 (this book) the reader gains expert advice on how the components of IT Service are 'crystallised' in a real environment. There's a delightfully simple set of steps: **OVERVIEW OF THE SERVICE DESIGN PACKAGE THE SERVICE STRATEGY ASPECTS OF SERVICE DESIGN OUTPUTS OF THE SERVICE DESIGN PHASE OUTPUTS OF THE SERVICE TRANSITION PHASE OUTPUTS OF THE SERVICE OPERATION PHASE** Within these the Author gives a very simple set of templates (or tells you where they are to be found), practical guidance and very simple checklists. It's up to the reader how far you develop each stage: a lot depends on the nature of your business of course. The joy of this approach is that the reader knows that all basic components are identified – and that more extensive resources are referred to if the reader wishes to extend.

**Building Leadership Development Programmes Oct 07 2020** Most leadership development runs on rails: courses are organized with standard content usually delivered by companies set up expressly for that purpose. Most leadership programmes fail when judged on whether they achieve lasting impact and behaviour change because what is covered is often forgotten after the programme ends. **Building Leadership Development Programmes** is designed to show how leadership development should work. It challenges the widely accepted notion that leadership development cannot be measured and it exemplifies how to design programmes that are in line with organizational needs and deliver lasting and measurable impact. **Building Leadership Development Programmes** is structured around detailed case studies from around the world that offer unique insights into the process of building effective leadership development, looking at a range of approaches from almost zero cost options to high end investment that actually works. It helps readers think through what it is that they are actually trying to achieve, offering processes to work through to establish what is necessary for their organization and take a longer view than looking for quick fixes. It features case studies including Crotonville Leadership Centre who have worked with GE, McKinsey and the Red Cross, and interviews with world authorities on leadership and talent development. Detailed guidance will help identify the right measures to ensure impact, and to adopt the right methodologies, including looking at leadership coaching, mentoring, social learning and action learning, blowing apart the idea that expensive training courses are always required.

**A review of school feeding programmes in the Caribbean Community May 02 2020** This review provides a snapshot of the state-of-art of School Feeding Programmes in 14 of the 15 CARICOM Member States. It provides an overview of the different models of school feeding programmes that currently exist in the Caribbean, challenges faced and recommendations for improvement. Among the aspects evaluated include: the governance structure, nutritional quality of meal served, linkages with small farmers for the procurement of products used in the meals, involvement of children in school gardens related activities, etc. The document includes a case study for each of the participating countries (namely Antigua and Barbuda, Bahamas, Barbados, Belize, Dominica, Grenada, Guyana, Haiti, Jamaica, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname and Trinidad and Tobago). For each of these countries, an Annual Net Benefit Analysis was conducted, using information collected in 2017. The aim is that the document can provide preliminary information and recommendations that can be relevant for governments, public organizations, donors, opinion leaders, private sectors, and others toward strengthening school feeding programmes in the Caribbean. It was developed with the support of the University of the West Indies and the Caribbean Agro-Economic Society under the leadership of Prof. Carlisle Pemberton and Dr. Hazel Paterson-Andrews.

**The Evolution of Project Management Practice Mar 12 2021** Project practice has undergone significant changes requiring new ways of thinking about and managing projects. The single focus on the staged delivery of artefacts is gradually being replaced by a wider interest in stakeholders, value, benefits, and complexity. As a result there is a growing interest in the development of practitioner capabilities, grounded in the recognition that dealing with permeable boundaries and unstructured situations transcends normative processes. Modern practitioners increasingly utilise deliberative and reflective approaches, often challenging received wisdom and traditional interpretations. This volume provides a sampling of some of the best writing in the project domain, enabling readers to access a wider group of authors, ideas, and perspectives. Key topics covered include agility and programme management, planning, people, business cases, contracts, teams, sponsorship, collaboration, strategy, patterns, context, change, and benefits. *Bridging the Business-Project Divide* Jan 28 2020 In organizations these days, there are two cultures, two sets of expectations, two languages; that of the business-as-usual organization and separately that of projects. These cultures need to work together effectively. Unfortunately, the natural side-effect of two such different perspectives is misunderstanding, mutual incomprehension, and despite good intentions on both sides, failure to deliver desired benefits. In *Bridging the Business-Project Divide* John Brinkworth tackles these issues by examining: · symptoms - how do we know there is a problem? How is it manifested?; · causes - looking beyond the symptoms to consider the root causes; and · solutions - how addressing the root causes could lead to more successful projects. He offers an analysis that is initially focused on the main elements within the project lifecycle; covering the business perspective for each lifecycle step, then the project perspective, and finally a consideration of how these viewpoints can be bridged. He then switches to look at some of the common strands of activity that run through every project: quality, planning, HR, finance, reporting and benefits and provides a similar analysis. This is a wonderfully pragmatic book which understands that one of the most natural ways to connect projects and business-as-usual activities is by identifying the needs of both, where these diverge and, most importantly, how to bring them together.

*Managing Successful Programmes* Sep 17 2021 Combining rigour and flexibility, *MSP* helps all organisations - public sector and private, large and small - achieve successful outcomes from their programme management time and time again. With change a pressing reality for all organisations, successful programme management has never been more vital to success. Organisations must respond as new processes or services are introduced, supplier relationships alter and structures adapt to market forces or legislation. At the same time, all organisations strive to achieve excellence by improving practices, offering better services, preparing more effectively for the future and encouraging innovation. But change always creates new challenges and risks. Inevitably there will be interdependencies to manage and conflicting priorities to resolve as the organisation adapts not just to a new situation internally but to the constantly shifting world outside. To enable organisations to manage their programmes successfully, they need a structured framework that does two things. It must acknowledge that every programme exists in its own context and demands unique interpretation. At the same time it must be universally applicable. *MSP* has been developed with these two priorities in mind. Its framework allows users to consistently manage a huge variety of programmes so that they deliver quality outcomes and lasting benefits. Fusing leadership with management best practice, *MSP* enables organisations to coordinate their key functions, develop a clear sense of unity and purpose and achieve the strategic cohesion necessary to drive through effective change

*Oxford Handbook for the Foundation Programme* Apr 12 2021 The *Oxford Handbook for the Foundation Programme* returns in a new edition to keep junior doctors, as well as their supervisors and senior medical students, up-to-date and give them the information and confidence they need to excel during and beyond the Foundation Programme. This new edition has been fully revised to take in the latest guidelines, the new junior doctors' contract, and the most recent Foundation Programme curriculum. It has new sections to demystify the NHS structure and explore key changes in social care and the interface with the NHS, and revised key information on the medical certificate of the cause of death, the role of the medical examiner, and changes to interactions with the coroner, as well as a new standalone chapter on Psychiatry. The junior doctor's pocket mentor, this handbook distils the knowledge of four authors across multiple NHS environments in an easy access format, covering everything from practical guidance at the patient's bedside to aspects of adapting to day-to-day life as a junior doctor that are rarely covered in medical school. With this indispensable survival guide to the Foundation Programme, you need never be alone on the wards again.
